

## Diagnosis Temperature-Pressure

**Compressor type**  
**Expansion Device**

**Variable Displacement ( internally contr'd)**  
**Expansion Valve**

**Pressure High Side**

**Too high ( see gauge)**

**Pressure Low Side**

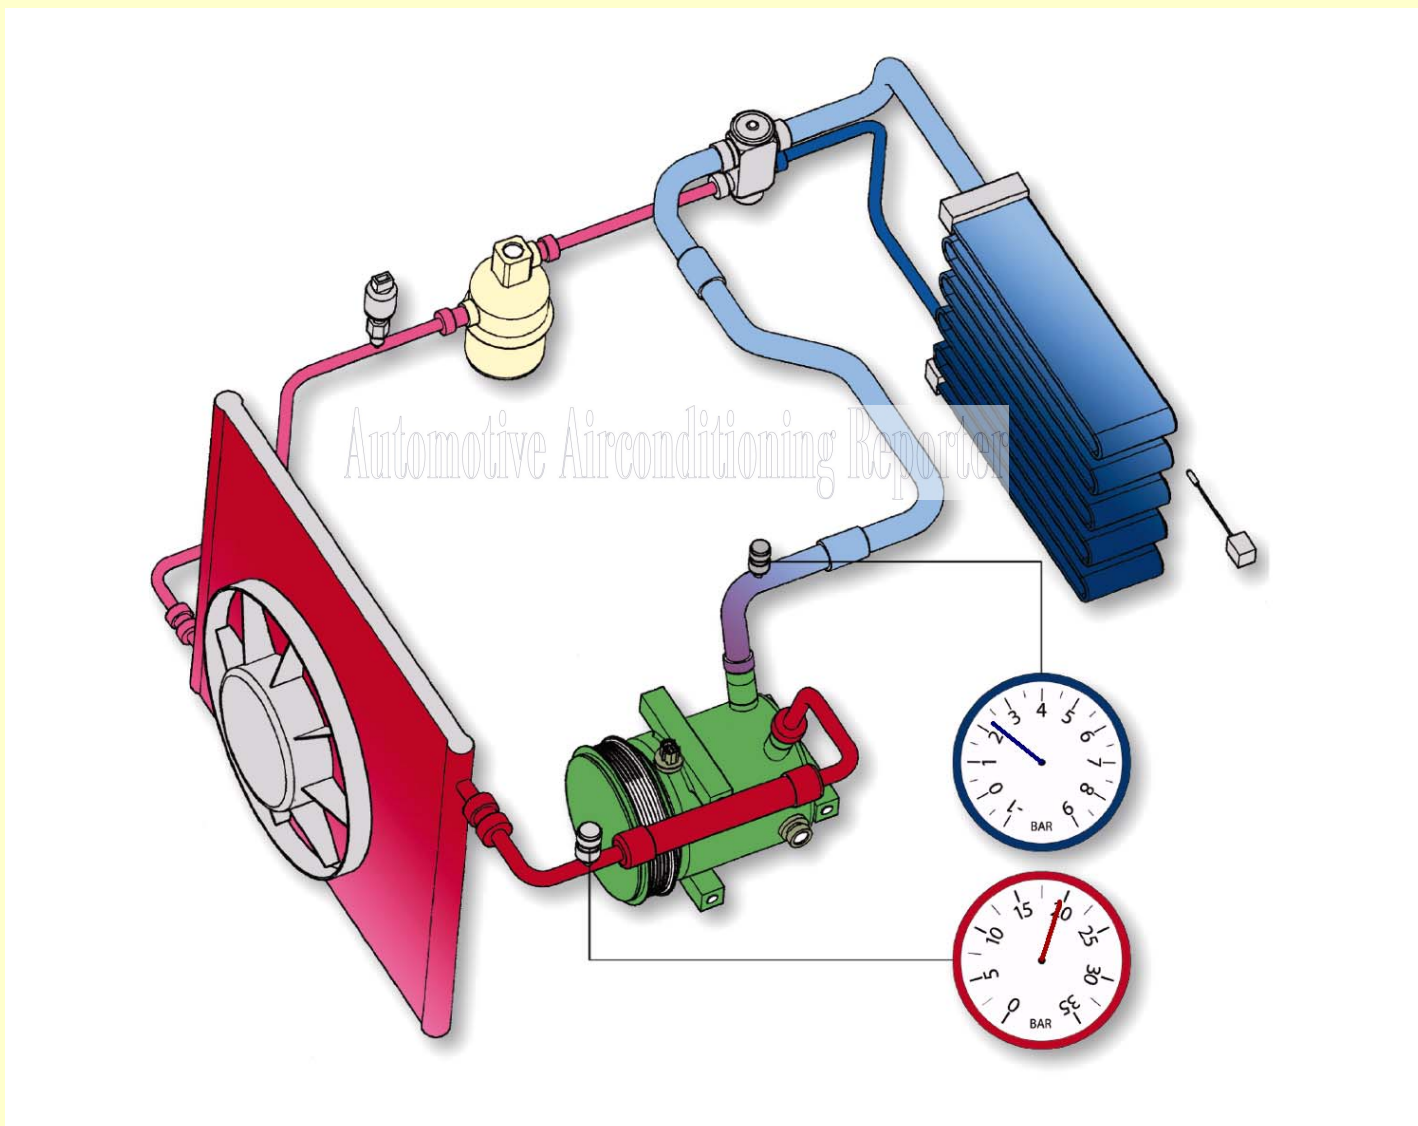

**Ranges from normal to high ( see gauge)**

**Temperature suction line**

**Cold**

**Symptom**

**Unit does cool**

### **Possible causes:**

- **System slightly overfilled**
- **Slightly contaminated condenser**
